1902.

REPORT.

TO THE RIGHT HON.

LORD BALFOUR OF BURLEIGH, K.T.,

His Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, 10th October, 1902.

MY LORD,

I had the honour in 1901, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 80, to transmit to your Lordship, as His Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1900, along with the usual Explanation and Commentary.

At the same time my Thirty-sixth Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1900).

I have the honour to be,

MY LORD,

Your most obedient Servant.

STAIR AGNEW,

Registrar-General

REPORT TO THE REGISTRAR-GENERAL,

BY R. J. BLAIR-CUNYNGHAME, M.D., F.R.S.E.

SIR,

In last Report use was made of the number of the population of Scotland as enumerated on 31st March, 1901, and as obtained from the Summaries sent in by the local Registrars shortly after the above date. The population then given was 4,472,000—males 2,173,151, females

TABLE I.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1900, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

YEARS	Estimated Population.	BIRTHS.		Deaths.	Marriages.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illegit. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.

Principal Towns above 25,000 inhabitants. Large Towns above 10,000 and under 25,000 inhabitants. The Small Towns from 3000 to 10,000 inhabitants from 1855 to 1870, but from 1871 onwards the Small Towns have from 2000 to 10,000 of population.

&c., is 4,472,103—males 2,173,755, females 2,298,348—showing an understated difference of 103.

The total population of Scotland as estimated to the 30th June 1900, is 4,436,958—males 2,155,512, females 2,281,446.

Table II. shows how the population is distributed in the five Registration Districts into which the country is primarily divided. In the Principal Town Districts the total estimated population is 1,828,594—males 876,289, females 952,305; in the Large Town Districts it numbers in all 586,563—males 288,866, females 297,697; the inhabitants of the Small Town Districts total to 940,985—males 458,979, females 482,006; in the Mainland Rural Districts they are 960,501—males 474,361, females 486,140; and the Insular Rural Districts have a gross population of 120,315—males 57,017, females 63,298.

TABLE IV.—Percentage of Births, Deaths, and Marriages in the Five Groups of Districts of Scotland, to the Population during each of the Years 1855–1900.

YEARS.	Principal Town.			Large Town.			Small Town.			Mainland-Rural.			Insular-Rural.		
	Births.	Deaths.	Mar- riages.	Births.	Deaths.	Mar- riages.	Births.	Deaths.	Mar- riages.	Births.	Deaths.	Mar- riages.	Births.	Deaths.	Mar- riages.

BIRTHS.

The total number of births registered during 1900 is 131,401, and forming a birth-rate of 2·96 per cent., or 296 in every ten thousand of the population, and is the lowest rate noted in these reports.

The mean birth-rate for the last ten years is 3·03 per cent., or 303 per ten thousand of the population as estimated.

The male births for the present year number 67,147, the female 64,254, showing a preponderance of the former of 2893.

The births are in excess of the deaths during the year by 49,105.

The number of illegitimate births registered during the year is 8534, equal to 6·49 per cent. of all births, the same rate as last year and the lowest yet recorded. The male illegitimates are 4338, the female 4196.

Tables VIII. and IX. indicate how the births occur in the five Registration Districts. In the Principal Town Districts the number registered during the year was 57,089—males 29,118, females 27,971, together giving a rate of 3·12 per cent.; in the Large Town Districts they are 18,686—males 9536, females 9150, together showing a birth-rate of 3·19 per cent.; in the Small Town Districts they total to 28,459—males 14,618, females 13,841, at the rate of 3·02 per cent.; in the Mainland Rural Districts they amount to 24,582—males 12,519, females 12,063, a rate of 2·56 per cent.; and in the Insular Rural Districts the births in all are 2585—males 1356, females 1229, giving a birth-rate of 2·15 per cent. to the population of the same.

As to the illegitimate births alone these same Tables show how 3626 of them are registered in the Principal Town Districts—males 1857, females 1769, equal to 6·35 per cent. of the total births in the same; in the Large Town Districts they are 918—males 447, females 471, or 4·91 per cent. of all; in the Small Town Districts they number 1723—males 877, females 846, and equal to 6·05 per cent. of all in those districts; in the Mainland Rural Districts they total to 2124—males 1086, females 1038, at the rate of 8·64 per cent. of all; and in the Insular Rural Districts they are 143—males 71, females 72, and equal to 5·53 per cent. of all the births registered

TABLE V.—Number of Births, Deaths, and Marriages in the Principal Towns of Scotland during 1900, and their Proportion to the Estimated Population; also the Illegitimate Births, and their Proportion to the Total Births.

TOWNS.	Esti- mated Popula- tion, 1900.	BIRTHS.		ILLEGITIMATE BIRTHS.		DEATHS.		MARRIAGES.

Table V. gives similar information as to the Principal Towns of Scotland, where it is seen the highest birth-rate occurs in Coatbridge—3·798 per cent.—followed by Govan and Partick with one of 3·676 per cent., Greenock with one of 3·250 per cent., Leith with one of 3·244 per cent., Glasgow with one of 3·233 per cent., Aberdeen with one of 3·181 per cent., Paisley with one of 3·141 per cent., Kilmarnock with one of 3·092 per cent., Dundee with one of 2·935 per cent., Edinburgh with one of 2·625 per cent., and Perth with one of 2·429 per cent.

As to the illegitimate births alone, the largest percentage of those appear in Dundee—8·80 per cent.—followed by Aberdeen with 8·07 per cent., Edinburgh with 7·93 per cent., Perth with 7·19 per cent., Glasgow with 6·51 per cent., Kilmarnock with 5·09 per cent., Paisley with 4·80 per cent.,

TABLE VII.—Births in Scotland, 1855-1900; with the Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; also the Number of Twin and Triplet Births during each year; and the Proportion of Mothers who had Multiple Births.

Leith with 4.10 per cent., Greenock with 3.63 per cent., Govan and Partick with 3.04 per cent., and Coatbridge with 2.82 per cent.

Table VI. shows the same conditions as to each county in Scotland thus—of illegitimate births the lowest proportion to the total births occurs in Shetland, 4.55 per cent.; in Renfrew 4.06 per cent.; and in Dumbarton 3.53 per cent.; the highest falling in Kincardine, 11.16 per cent.; in Elgin, 12.16 per cent.; in Dumfries, 12.30 per cent.; in Banff, 12.56 per cent.; and Wigtown, 13.19 per cent. In fourteen counties the rate is under that for Scotland, which is 6.49 per cent.

Of the total births registered throughout Scotland during 1900 the males numbered 67,147, the females 64,254, which gives a proportion of 104.5 of the former to every 100 of the latter. The corresponding ratio among the legitimate alone is 104.6 males to every 100 females, and among the illegitimate 103.4 males to every 100 females.

During the year 1544 mothers bore twins and 15 bore triplets, so that of the total mothers who bore children one in every 84 bore two and one in every 8655 bore three at a birth.

The births were registered throughout Scotland month by month as follows:—8.91 per cent. during January, 8.80 per cent. during May, 8.78 per cent. during March, 8.70 per cent. during June, 8.65 per cent. during July, 8.64 per cent. during April, 8.60 per cent. during October, 8.53 per cent. during August, 7.88 per cent. during September, 7.56 per cent. during December, 7.54 per cent. during February, and 7.41 per cent. during November.

TABLE VIII.—Births, 1900. Number of Legitimate, Illegitimate, and Total Births in Scotland, and its Five Groups of Districts, distinguishing the Sexes. Also the number of Twin and Triplet Births.

The birth-rate for each ten thousand of the population as estimated for the present year in the following European States is—393 in Hungary, 361 in Prussia, 356 in the German Empire, 344 in Spain, 329 in Italy, 315 in the Netherlands, 301 in Norway, 298 in Denmark, 289 in Belgium, 286 in Switzerland, 269 in Sweden, and 214 in France.

MARRIAGES.

32,444 marriages in all were registered throughout Scotland during the year 1900, a smaller number than during the previous year by 534, and is equal to a marriage-rate of 73·12 per ten thousand of the inhabitants, a lower rate than that for the two previous years. The mean average rate for the last ten years (1890-1899) is 70 per ten thousand of population.

The rate of marriage is, as usual, found to vary in each of the five Registration Districts and in the counties in Scotland. Thus among the former it is in the Principal Town Districts 90·87 per ten thousand of the inhabitants of the same; in the Large Town Districts the rate is 75·44 per ten thousand; in the Small Town Districts it is 65·25 in like proportion; in the Mainland Rural Districts it is 50·26; and in the Insular Rural Districts it is 36·24 per ten thousand of the population (Table VI.). These rates are in each district below what they were in 1899.

In the counties also the rate varies much—from 88·63 per ten thousand of estimated population, the maximum, in Lanark, and 86·18 in Edinburgh, to 33·06, the lowest, in Sutherland. In three counties the rate is above that for all Scotland, which is 73·12 per ten thousand—viz., 73·50 in Forfar, and in Edinburgh and Lanark, as just mentioned. The lowest rates occur in Ross and Cromarty, 38·75; in Bute, 38·37; in Argyll, 37·78; in Caithness, 35·47; and in Sutherland, 33·06—in each case in the like proportion as formerly.

Table V. shows the number of marriages and the corresponding rate in the Principal Towns of Scotland, the latter being in Glasgow equal to 99·4 per ten thousand of its inhabitants; in Edinburgh the rate is 97·6, in Dundee it is 80·1, in Aberdeen it is 89·9, in Govan and Partick it is 64·2, in Leith it is 70·8, in Paisley it is 85·3, in Greenock it is 77·2, in Coatbridge it is 80·5, in Perth it is 91·9, and in Kilmarnock it is 92·3.

TABLE X.—Marriages, 1900. Number of Marriages contracted in Scotland and its Five Groups of Districts according to the Rites of the several Religious Denominations, and their Proportion to the Total Marriages in each Group.

* The Free and United Presbyterian Churches were united on 31st October 1900, and after that date formed the United Free Church.

The fertility of the marriages for the year is estimated as usual. The number of marriages registered during 1894 amounted to 27,604, and the legitimate births recorded during the present year (1900) amount to 122,867, so that $\frac{122867}{27604}$ gives 4.45 as the average fertility of each marriage, or 445 children were born to every 100 marriages.

Tables X., XI., and XII. afford some information as to the number and proportion of marriages as performed in Scotland and in each of the primary Registration Districts by the clergy of various religious denominations. Thus, of the whole 32,444 marriages, 14,600 were performed by ministers of the Established Church, 4705 during ten months of the year by those of the Free Church, 2769 during the same period by those of the United

* See Note p. xvi. Combined rate for 1900 for Free, United Presbyterian, and United Free Churches = 28·49 per cent.

Church, 2·56 per cent. to the Episcopal Church, 6·47 per cent. to other denominations, in 0·19 per cent. the denomination is not stated, and 2·06 per cent. of all were irregular.

Table Xa. gives the number of marriages celebrated according to the rites of the several religious denominations and the proportions thereof in the Registration Counties and Principal Towns in Scotland. In eight of the counties over 60·00 per cent. of the marriages were solemnized by clergy of the Established Church, viz., Shetland, Kincardine, Haddington, Selkirk, Roxburgh, Dumfries, Kirkcudbright, and Wigton, and in fourteen more the rate was over 50·00 per cent. In Ross and Cromarty alone is the rate under 20·00 per cent. Marriages performed by ministers of the Free Church are in greatest proportion in Sutherland, 50·70 per cent., and in Ross and Cromarty, 51·85 per cent.; they are at their minimum in Selkirk, Clackmannan, and Kinross, in each case being under 10·00 per cent. Marriages in connection with the United Presbyterian Church bulk most largely in Clackmannan 16·10 per cent., in Orkney 19·62 per cent., and in Kinross 21·43 per cent., being at their minimum in Caithness 0·83 per cent., in Inverness 0·92 per cent., and in Ross and Cromarty 1·35 per cent., there being none in Sutherland. A column is added for the marriages in the United Free Church during the months of November and December (*see* footnote, p. xvi.). Marriages performed in accordance with the rites of the Roman Catholic Church are in largest proportion in Forfar 8·92 per cent., in Inverness 9·45 per cent., in Linlithgow 15·95 per cent., in Lanark 16·36 per cent., in Renfrew 17·35 per cent., and in Dumbarton 21·35 per cent., being lowest in Clackmannan 1·95 per cent., in Elgin 1·34 per cent., in Aberdeen 1·25 per cent., and in Kirkcudbright 0·48 per cent., there being none in Shetland, Orkney, Caithness, Sutherland, Ross and Cromarty, Nairn,

Kincardine, Kinross, and Berwick. Episcopal Church marriages are most in evidence in Nairn with 5·00 per cent., in Edinburgh 5·90 per cent., in Forfar 6·47 per cent., and in Kincardine 9·76 per cent., being least so in Shetland, Ross and Cromarty, and in Inverness, there being none in Orkney, Caithness, Sutherland, Bute, and Wigtown. Marriages performed by clergymen of other denominations than the above are most marked in Renfrew 10·45 per cent., in Ross and Cromarty 11·78 per cent., and in Nairn 12·50 per cent.; least so in Orkney, Kincardine, Haddington, and Kirkcudbright, there being none in Kinross and Bute. Irregular marriages are most noticeable in Lanark, where 9·28 per cent. of all are of this character, and in Edinburgh 13·62 per cent.: they are least so in Roxburgh with 0·36 per cent., in Ross and Cromarty 0·34 per cent., in Linlithgow 0·24 per cent., and in Dumbarton 0·15 per cent., there being none in Shetland, Sutherland, Nairn, Banff, Kincardine, Kinross, Clackmannan, and Berwick.

In the Towns the largest proportion of marriages performed by clergy of the Established Church occurs in Kilmarnock and Perth each 49 per cent.,

Aberdeen 52 per cent., and Leith 54 per cent.; the smallest in Edinburgh 34 per cent., Paisley 33 per cent., and Coatbridge 22 per cent. Marriages celebrated by ministers of the Free Church are mostly in evidence in Paisley and Perth, each with 17 per cent., and Kilmarnock 18 per cent.; least so in Leith 13 per cent., and Glasgow 12 per cent. The highest proportion of marriages performed by ministers of the United Presbyterian Church occur in Glasgow 10 per cent., and Coatbridge and Paisley each with 11 per cent. (*vide* footnote, p. xvi.). Marriages performed under the auspices of the Roman Catholic Church are chiefly in Paisley and Greenock, each 17 per cent., Govan and Partick 18 per cent., and Coatbridge 31 per cent.; least so in Perth, 5 per cent., and Aberdeen 2 per cent. Those in accordance with the usages of the Episcopal Church show the largest ratio

in Edinburgh 7 per cent., and Dundee 9 per cent.; the least in Glasgow, Paisley, and Coatbridge, each 2 per cent. Marriages solemnized by ministers of other denominations than the aforesaid are most marked in Paisley, 11 per cent., Dundee 12 per cent., and Greenock 13 per cent.; least so in Edinburgh 4 per cent. Irregular marriages are most apparent in Glasgow 13 per cent., and Edinburgh 19 per cent.; least so in Leith, Greenock, and Coatbridge, each with some 2 per cent., and in Paisley with 1 per cent.

Of the men and women married during the year all but one of the former and two of the latter stated their age on the occasion. Of the male spouses 2006, or 6.18 per cent. of all, were under 21 years of age at marriage, and of the female 6039, or 18.61 per cent., were the same. Twenty-three of

of the bridegrooms were over 75, and two of the brides between 70 and 75. Table XIII.

The proportion of marriages at various ages in Scotland and in each of the primary Registration Districts is given in Table XIV., where it is seen that in every hundred marriages during the year 2'56 of the husbands were under 20 years of age, the corresponding proportion among the wives being 10'65, those ratios being exceeded in the case of the former in the Principal and Large Town Districts, and of the latter in the Small Town Districts as well. Between 20-25 years, 34'55 per cent. of the men, and 44'10 per cent. of the women married, exceeded in the case of both in the Large and Small Town Districts. Between 25-30 years, 33'97 per cent. of the bridegrooms and 26'88 per cent. of the brides were united, exceeded in the case of the former in the Small Town Districts and Mainland Rural Districts, and of the latter in the two Rural Districts. Between 30-35 years, 13'83 per cent. of the men and 9'76 per cent. of the women married, exceeded in the case of both in the Principal Town Districts and in the two Rural. Between 35-40 years, 6'83 per cent. of the men married, 4'33 being the corresponding ratio for the women, exceeded in the case of the males in the two Rural Districts, and of the females in the Principal Town and Insular Rural Districts. Between 40-45 years, but 3'60 per cent. of the husbands took to themselves wives, and 2'13 per cent. of the latter accepted husbands, the greatest proportion of marriages among the men at this age occurring in the Rural Districts. At ages over this the rate is low, and that in each District.

During the year 23,685 bachelors espoused spinsters, 908 bachelors married widows, 2044 widowers mated with spinsters, and 801 widowers with widows; or 88'41 in every hundred marriages were between bachelors and spinsters, 2'80 between bachelors and widows, 6'30 between widowers and spinsters, and 2'47 between widowers and widows.

Table XVIII. affords some information as to the condition of those marrying during the year from an educational point of view inasmuch as there is here given the proportion of husbands and wives who signed the register upon that occasion, or who in lieu thereof made use of their *mark* only. Thus in Scotland 97'84 per cent. of the men and 97'24 per cent. of the women wrote their names, leaving 2'16 per cent. of the former and 2'76 per cent. of the latter who simply adhibited their *mark* instead. These ratios vary in the different groups of districts, there being in the Principal Town Districts 2'26 per cent. of the husbands and 2'94 per cent. of the wives who did not sign their names; in the Large Town Districts the corresponding proportions are 2'21 per cent. and 2'10 per cent.; in the Small Town Districts they are 2'49 per cent. and 3'45 per cent.; in the Mainland Rural Districts 0'91 per cent. and 1'14 per cent.; and in the Insular Rural Districts 6'88 per cent. of the bridegrooms and 11'24 per cent. of the brides were apparently unable to write their names. In nine of the counties the men made use of *mark* in a greater proportion than was the case for Scotland, the women failing in the same way in eight. The counties in which the former occur are Sutherland, Ross and Cromarty, Inverness, Dumbarton, Argyll, Renfrew, Lanark, Linlithgow, and Peebles; those in which the latter, Caithness, Sutherland, Ross and Cromarty, Inverness, Dumbarton, Lanark, Linlithgow, and Haddington. In the counties of Orkney, Kinross, and Bute the whole both of bridegrooms and brides signed, all the former doing the same in Nairn, and all the latter in Kincardine and Wigtown.

As to the two cities, Edinburgh and Glasgow—in Edinburgh 98·81 per cent. of the husbands signed the register, and 98·71 per cent. of the wives did the same, leaving 1·19 per cent. of the former and 1·29 per cent. of the latter who made use of their *mark*; and in Glasgow 96·85 per cent. of the men and 95·77 per cent. of the women signed, leaving 3·15 per cent. of the former and 4·23 per cent. of the latter who adhibited their *mark*.

15·44 per cent. of the marriages during the year were registered during June, 14·60 per cent. during December, 12·41 per cent. during January, 12·35 per cent. during July, 7·76 per cent. during April, 6·58 per cent. during September, 6·27 per cent. during October, 6·04 per cent. during November, 5·62 per cent. during August, 5·18 per cent. during February, 5·15 per cent. during March, and 2·60 per cent. during May.

The marriage rate per ten thousand of estimated population in the under-noted European States during 1900 is as follows:—61 in Sweden, 69 in Norway, 71 in Italy, 76 in Denmark and the Netherlands, 77 in Switzerland and France, 85 in the German Empire, 86 in Prussia and Belgium, and 88 in Hungary and Spain.

DEATHS.

82,296 deaths were registered in Scotland during the year 1900, giving a mortality rate of 185 in every ten thousand of the population, or one death in every 54 of the inhabitants; 41,276 of those are of the male sex, and 41,020 of the female. The death-rate among the males alone is 192 per ten thousand, and among the females 180. The deaths during the present year are in excess of those of the previous by 2703. The mean death-rate for the last ten years is 186 per ten thousand of the population.

Tables XIX. and XX. give the number of deaths and the mortality rate in each of the five primary Registration Districts. In the Principal Town Districts the number of deaths registered is 36,819, being at the rate of 201 in each ten thousand of the estimated population; the male deaths are 18,550, the female 18,269, the rate for the former being 212, and for the latter 192 per ten thousand of the respective sexes. In the Large Town Districts the registered deaths are 11,046, which gives a death-rate of 188 per ten thousand of the population in the same; the male deaths are 5588, at a rate of 193 per ten thousand, and the female 5458, at a rate of 183 in like proportion. In the Small Town Districts the deaths total to 16,417, at a rate of 174 per ten thousand of the inhabitants, the males alone being 8167, at a rate of 178, and the females 8250, at a rate of 171 per ten thousand of the respective populations. In the Mainland Rural Districts the deaths are 15,848, and equal to 165 in every ten thousand of the population of the same; the male deaths are 7934, or 167 per ten thousand, and the female 7914, or 163 in like ratio. In the Insular Rural Districts the total deaths are 2166, at a rate as formerly of 180; the male deaths are 1037, their rate being 182, the female 1129, equal to 178 per ten thousand.

When the total Urban and Rural death-rates for the year are compared, 191 per ten thousand of the former population corresponds to 166 of the latter. The death-rate in the case of both sexes in the Principal and Large Town Districts is above the same for Scotland, and in no case is the female rate higher than the male.

Tables XXI. and XXII. give information of a similar kind as to each of the Principal Towns in Scotland. The number of deaths registered in Glasgow during 1900 is 16,392, which gives a mortality rate of 22 per

thousand of its inhabitants; in Edinburgh the deaths are 5876, at the rate of 19 per thousand; in Dundee they are 3391, with a rate of 21 per thousand; in Aberdeen they are 2866, at a rate of 19; in Govan and Partick they are 2153, with a rate of 17 per thousand; in Leith they number 1230 in all, at a rate of 16 per thousand; in Paisley they are 1608, in rate 21; in Greenock they total to 1300, at a rate of 19; in Coatbridge they are 752 and 21 respectively; in Perth they are 706 and 22; and in Kilmarnock the deaths are 545, at the rate of 16 per thousand of the estimated population of the same.

Tables XXIII. and XXIV. give the number of deaths in Scotland and in each of the five primary Registration Districts at a series of ages and the proportion of those to the population estimated to be alive at each age. Thus, of male infants in Scotland 15·663 per cent. died during the first year of life, 12·727 being the corresponding percentage among the females;

proportions exceeded in the case of both sexes in the Principal and Large Town Districts. The rate falls in the remaining districts, being lowest in the Insular Rural, where 7·852 per cent. of the male infants and 7·797 per cent. of the female succumbed at this early age. In each district the male rate is above the female.

Under two years of age 5·199 per cent. of the males and 4·910 per cent. of the females died in Scotland, ratios which are exceeded in the case of both sexes in the Principal and Large Town Districts, the lowest rate falling in the Rural Districts. The female rate in the Large Town Districts is higher than the male.

Under three years of age the male mortality rate for Scotland is 1·897 per cent., the female 1·837 per cent., exceeded, and that for both sexes, in the Principal and Large Town Districts. The lowest rate occurs in the

Mainland Rural Districts, 0·898 and 0·805 per cents. In the Principal Town and Insular Rural Districts the female rate is higher than the male.

Under four years of age the rate for Scotland is in the case of the males 1·095 per cent., and of the females 1·176 per cent., proportions exceeded for both sexes in the Principal Town Districts, and in that of the females in the Large Town Districts. The lowest male death-rate at this age falls in the Mainland Rural Districts, and the female in the Insular Rural Districts. In Scotland, in the Principal Town Districts, in the Large Town Districts, and in the Mainland Rural Districts, the female rate is above the male.

Under five years of age the male death-rate for the country is 0·773 per cent., the female 0·789 per cent., proportions exceeded and that for both sexes in the Principal and Large Town Districts. The lowest rates are in the Insular Rural Districts, 0·470 and 0·230 per cents. The female ratios for Scotland, the Principal Town Districts, and the Mainland Rural Districts are above the male.

At all ages under five years 5·084 per cent. of the male children in Scotland and 4·413 per cent. of the female died, proportions exceeded in the case of both sexes in the Principal and Large Town Districts. The lowest rate occurs in the Insular Rural Districts, and in each district the male

rate is higher than the female. Between five and ten years the mortality rate for Scotland fell to 0·418 per cent. in the case of the males, and 0·438 per cent. in that of the females, ratios exceeded by both sexes in the Principal Town Districts. The lowest rate at the age is in the Rural Districts. In Scotland and in the Principal and Small Town Districts the female rate is higher than the male. Between ten and fifteen years the mortality rates are at their lowest, that for the males in Scotland being 0·276 per cent., and for the females 0·306 per cent., ratios exceeded in the case of both sexes in the Principal Town Districts, and by that of the males in the Large Town and Insular Rural Districts. In Scotland, in the Principal Town, Small Town, and Mainland Rural Districts the female rate is higher than the male. Between fifteen and twenty years the male rate for Scotland is 0·464 per cent., the female 0·444 per cent., exceeded as to the males in the Principal Town and Insular Rural Districts, and as to the females in the two Rural Districts. In the Large Town Districts and Mainland Rural Districts the female rate is above that of the male. Between twenty and thirty years the male rate for the whole country is 0·787 per cent., the female 0·677 per cent., ratios exceeded in the case of both sexes in the Principal and Large Town Districts, and of the males in the Insular Rural Districts. In all cases at this age the male death-rate is above that of the female. Between thirty and forty years the male rate for Scotland is 0·979 per cent., the female 0·935 per cent., proportions exceeded and for both sexes in the Principal Town Districts, and for the males in the Insular Rural Districts. After this age the mortality rate at each age rises steadily, and as a rule the Urban rate is above that for the whole country.

Table XXVI. gives the number of deaths at different ages in the Principal Towns of Scotland during 1900, and Table XXVII. the percentage of deaths to the population presumably alive at the same age. Infants under one year died in greatest proportion in Dundee, where 19·92 per cent. of

the mortality among male infants under one year of age formed 23·04 per cent. of the total deaths at all ages, among the females it was 17·99 per cent., proportions exceeded in the case of both sexes in each of the three Urban Districts. At all ages under five years the male rate throughout Scotland was 34·95 per cent., the female 29·18 per cent., ratios exceeded as to both sexes in the Principal and Large Town Districts, and as to the males in the Small Town Districts.

The death-rate per ten thousand of the population as estimated of the following European States during 1900 is 294 in Spain, 269 in Hungary, 237 in Italy, 221 in German Empire, 219 in France, 218 in Prussia, 193 in Switzerland, 178 in the Netherlands, 169 in Denmark, 168 in Sweden, and 158 in Norway.

CAUSES OF DEATH.

82,296 deaths were registered in Scotland during the year, in 81,543 of those the cause was properly specified, leaving 753 as not specified or ill-defined.

The total death-rate for Scotland is 1855 in every hundred thousand of the population, the male rate alone being 1915, and the female 1798.

During the year the number of registered deaths from Zymotics in Scotland is 10,961, being 225 more than those for last year, and are in the proportion of 249 in every hundred thousand of the population, and equal to 13·44 per cent. of the total specified deaths. The incidence of those diseases is most apparent in the Principal Town and Insular Rural Districts, least so in the Mainland Rural Districts. The rate in the Large Town and both Rural Districts is higher this year than in the same for last year.

Table XXXII. gives the number and proportions of deaths from the chief Zymotics and from some ordinary causes, so arranged as to exhibit the mortality due to each at five periods of life. Thus of the whole 10,961 Zymotic deaths 6110 occurred during the first five years of life, 586 between 5-10 years, 180 between 10-15 years, 2050 between 15-60 years, and 2035 at ages over this; the corresponding proportions being 55·7 per cent. during the early period, 5·4 per cent. during the following quinquennial period, 1·6 per cent during the third quinquennial period, 18·7 per cent. between 50-60 years, and 18·6 per cent. at ages over this, so that of the whole 62·7 per cent. occurred during the first 15 years of life. Table XXXIII. indicates that during the year 22·85 per cent. of the total deaths in Scotland registered as occurring during the first 15 years of life is due to Zymotics, 7·83 per cent. being that at ages above 15.

Smallpox is the cause of 53 deaths in Scotland during 1900, 10 being registered of children under five years of age, 1 between 5-10 years, 2 between 10-15 years, and 40 or 75·5 per cent. between 15-60 years. To Measles 18·25 deaths are attributed, 1655 or 90·7 per cent. of them being of children under five years of age, 112 or 6·1 per cent. between 5-10 years, 16 between 10-15 years, 40 between 15-60 years, and 2 at a greater age. Scarlet Fever caused 654 deaths, 438 or 67·0 per cent. of all during the first five years of life, 147 or 22·5 per cent. between 5-10 years, 33 or 5 per cent. during the following quinquennial period, and 36 at ages above this. From Hooping-cough there are 1812 deaths, the largest number again occurring during the early age, 1738 or 95·9 per cent. of the whole; 70 succumbed between 5-10 years, and 4 at greater ages, 1 of those being over 60. Influenza caused 2711 exits, 205 or 7·5 per cent. between 0-5 years, 19 and 21 between 5-10 years and 10-15 years respectively, 805 or 29·7 per cent.

between 15-60 years, and 1661 or 61·3 per cent. at a greater age than this. Diphtheria is the cause of 771 deaths, 566 or 73·4 per cent. dying before attaining the age of five years, 152 or 19·7 per cent. between 5-10 years, 28 or 3·6 per cent. between 10-15 years, and 25 or 3·3 per cent. between 15-60 years. Continued Fevers account for 698 deaths, 30 or 4·3 per cent. between 0-5 years, 51 or 7·3 per cent. between 5-10 years, 64 or 9·2 per cent. between 10-15 years, 536 or 76·8 per cent. between 15-60 years, and 17 or 2·4 per cent. at ages over 60. Typhus caused 35 deaths, 33 of them between 15-60 years. Enteric or Typhoid caused 644 deaths, 23 or 3·6 per cent. at ages under 5 years, 49 or 7·6 per cent. during the following quinquennial period, 62 or 9·6 per cent. between 10-15 years, 497 or 77·2 per cent. between 15-60 years, and 13 or 2·0 per cent. at a greater age. To Relapsing Fever 1 death is due, to Cerebro-Spinal 2, and to Simple or Ill-defined 16. Plague, for the first time occurring in these Reports as a cause of death, caused 9, 1 before the fifth year of life, 2 between 5-10 years, 1 between 10-15 years, and 5 between 15-60 years. Diarrhœa and Dysentery caused 1593 deaths during the year, 1158 or 72·7 per cent. during the first five years of life, 20 or 1·2 per cent. between 5-10 years, 8 between 10-15 years, 132 or 8·3 per cent. between 15-60 years, and 275 or 17·3 per cent. at greater ages. Syphilis caused 215 deaths, 176 or 81·8 per cent. at ages under 5 years, 1 between 10-15 years, 32 or 14·9 per cent. between 15-60 years, and 6 or 2·8 per cent. at ages over 60. Erysipelas caused 175 deaths, 54 or 30·8 per cent. in children under five years of age, 1 between 5-10 years, 70 or 40·0 per cent. between 15-60 years, and 50 or 28·6 per cent. at ages over this. Puerperal Fever caused 225 deaths, and naturally during the child-bearing period of life. Croup caused 190 deaths, 171 or 90·0 per cent. during the early period of life, 16 or 8·4 per cent. between 5-10 years, 2 between 10-15 years, and 1 of an aged person over 60 years.

Out of every hundred thousand of the population of Scotland 249 are computed to have died from some Zymotic disease during the year, equal to 13·44 per cent. of the total deaths from specified causes. These proportions vary in each of the five Registration Districts; that to the population as above being in the Principal Town Districts 277, and forming 13·75 per cent. of the specified deaths; in the Large Town Districts the ratios are 259 to population and 13·76 per cent. of the total deaths; in the Small Town Districts they are 228 per hundred thousand, and 13·08 per cent. of the deaths; in the Mainland-Rural Districts they are 203 and 12·28 per cent. respectively; and in the Insular-Rural Districts 323 died per hundred thousand of the inhabitants, equal to 17·91 per cent. of the total specified deaths.

Tables XXX. and XXXI. refer in like manner to the Principal Towns; thus in Glasgow Zymotics are the ascribed cause of 332 deaths in every hundred thousand of its population, or 15·26 per cent. of the total deaths are of this nature. Hooping-Cough accounts for 95 of the former, Measles for 62, Diarrhœa and Dysentery for 44, Scarlet Fever for 28, Influenza for 27, Fevers for 24 (2 Typhus, 22 Enteric), Diphtheria for 17, Smallpox for 5, and Plague for 1.

In Edinburgh 226 per hundred thousand of the population succumbed to Zymotics, or 11·93 per cent. of the total deaths. Influenza caused 57 of the former, Measles 41, Diarrhœa and Dysentery 37, Diphtheria 21, Hooping-Cough 20, Scarlet Fever 11, and Fevers 10 (1 Typhus, 9 Enteric or Typhoid).

In Dundee the deaths of 228 persons per hundred thousand of the

inhabitants were accounted for by Zymotics, and formed 10·79 per cent. of the total mortality. Diarrhoeal affections are credited with 79, Measles

inhabitants succumbed to Zymotics during the year, and equivalent to 13·87 per cent. of all the deaths. To Hooping-Cough 97 of these are ascribed, 56 to Measles, 35 to Diarrhoea and Dysentery, 15 to Influenza, 11 to Diphtheria, 5 to Fevers (4 Enteric), and 3 to Scarlet Fever.

In Leith the proportion to population from the same is 140, or 8·71 per cent. of all deaths. For 35 of the former ratio Diarrhoeal affections are accountable, for 23 Hooping-Cough, for 22 Measles and Influenza, for 10 Diphtheria, and for 4 Fevers (all Enteric).

In Paisley, 313 persons in every hundred thousand of its inhabitants died from Zymotics, or 15·26 per cent. of all the deaths come under this heading. Measles accounts for 70 of the former, Diarrhoea and Dysentery for 54, Hooping-Cough for 47, Scarlet Fever for 43, Influenza for 33, Fevers for 24 (all Enteric), and Diphtheria for 19.

In Greenock, 285 persons in the above proportion died from Zymotics, equal to 14·88 per cent. of all. For 111 of the former ratio Hooping-Cough is accountable, for 52 Diarrhoea and Dysentery, for 34 Diphtheria, for

19 Fevers (1 Typhus, 18 Enteric), for 18 Scarlet Fever and Influenza, and for 13 Measles.

In Coatbridge, 327 as above to population died from Zymotics, equal to 15·84 per cent. of all deaths. Of the former 63 are due to Scarlet Fever, 55 to Measles, 44 to Diarrhœa and Dysentery, 41 to Influenza, 36 to Diphtheria, 25 to Hooping-Cough, and 22 to Fevers (16 Enteric and 5 Simple or Ill-defined).

In Perth the rate to population from the same is 251, equal to 11·61 per cent. of all deaths. Eighty-nine of this rate are due to Hooping-Cough, 77 to Influenza, 21 to Diarrhœal Affections, 18 to Diphtheria, 15 to Measles, and 9 to Fevers (all Enteric).

In Kilmarnock the death-rate from Zymotics per hundred thousand of its population is 177, equal to 10·95 per cent. of all. Influenza is responsible for 54 of the above, Diarrhœa and Dysentery for 36, Fevers for 30 (all Enteric or Typhoid), Scarlet Fever for 21, Hooping-Cough and Diphtheria each for 9, and Measles for 6.

Fifty-three deaths from Smallpox were registered throughout Scotland during 1900—males 31, females 22. Forty-two of the deaths are registered

in the Principal Town Districts, eight in the Small Town Districts, and three in the Mainland-Rural Districts.

Measles caused 1825 deaths in Scotland—males 955, females 870—being at the rate of 42 in every hundred thousand of population, and equal to 2·24 per cent. of all. The highest mortality ratio from this occurred in the Principal Town, Large Town, and Insular-Rural Districts.

Scarlet Fever caused 654 deaths—males 315, females 339—a rate of 15 per hundred thousand of population and 0·80 per cent. of all deaths, the highest rate occurring in the Principal Town Districts.

To Influenza 2711 deaths are ascribed—males 1152, females 1559—equal to 62 in every hundred thousand of the population, and forming 3·32 per cent. of the total mortality. The districts which suffered most in this respect are the Small Town, Mainland, and Insular Districts, where in every hundred thousand of their respective inhabitants 67, 94, and 221 so succumbed, the corresponding rates in the Principal Town Districts being 36, and in the Large Town Districts 49.

From Hooping-Cough 1812 deaths occur—males 829, females 983—being in the proportion of 41 in every hundred thousand of population, and equal to 2·22 per cent. of all the deaths. The Principal and Large Town Districts show the highest mortality rates from this disease of 66 and 38 respectively, the lowest, 8, falling in the Insular-Rural Districts.

Diphtheria caused 771 deaths in Scotland—males 373, females 398—together equal to 18 per hundred thousand of the population as estimated, and forming 0·95 per cent. of the total mortality. The highest rate occurs in the Principal Town Districts, being the same as that for Scotland, and in the Large Town Districts, where it is 24, the lowest, 5, occurring in the Insular-Rural Districts.

Continued Fevers caused 698 deaths—males 421, females 277—at a rate

of 16 per hundred thousand of population, and forming 0·86 per cent. of all deaths. The highest rates occur in the Large and Small Town Districts, viz., 19 and 18 respectively. Typhus Fever caused 35 deaths, males 19, females 16; Enteric or Typhoid caused 644—males 392, females 252—equal to 15 in every hundred thousand inhabitants; Relapsing Fever caused the death of one male, Cerebro-Spinal Fever of one male and one female, and Simple or Ill-defined of eight of each sex.

Plague, for the first time mentioned in these Reports, is the registered cause of nine deaths—males 6, females 3. Eight occurred in Glasgow and one in Govan.

Table XXXVII. indicates that 115 of the deaths from Enteric Fever were registered in the Rural Districts, forming 92·74 per cent. of the total fever mortality in the same, while 529 of them occurred in the Urban Districts, equal to 92·16 per cent. of the fever mortality there. From Typhus there are three deaths in the Rural Districts, and 32 in the Town Districts; the two deaths from Cerebro-Spinal Fever being registered in the latter.

Diarrhœa and Dysentery caused 1593 deaths during the year—males 828, females 765—being at the rate of 36 in every hundred thousand of population, and forming 1·95 per cent. of the total deaths. The rate from these diseases to population as before is 45 in the Principal Town Districts, 39 in the Large Town Districts, 34 in the Small Town Districts, 22 in the Mainland-Rural Districts, and 13 in the Insular-Rural Districts.

To Cancer 3503 deaths are ascribed—males 1361, females 2142—being at the rate of 80 per hundred thousand of the population of Scotland, and equal to 4·30 per cent. of the deaths in the same. The rate in each district from Cancer is, 84 in the Principal Town Districts, 70 in the Large Town Districts, 77 in the Small Town Districts, 83 in the Mainland-Rural Districts, and 56 in the Insular-Rural Districts, and in every one, with the exception of the Insular-Rural, the female rate is higher than the male. Tables XXX. and XXXI. exhibit the incidence of Cancer in each of the Principal Towns:—thus, in every hundred thousand of the inhabitants of Edinburgh 116 are estimated to have succumbed to this disease, 102 in Greenock, 92 in Perth, 86 in Dundee, 85 in Aberdeen, 84 in Paisley, 81 in Kilmarnock, 76 in Glasgow, 74 in Leith, 55 in Coatbridge, and 50 in Govan and Partick.

Deaths caused by disease of a Tubercular character are 10,366 in number—males 5303, females 5033—and equal to 235 in every hundred thousand of population, forming 12·68 per cent. of all deaths. These rates occur in the five districts as follow:—271 or 13·44 per cent. in the Principal Town Districts; 247 or 13·11 per cent. in the Large Town Districts; 213 or 12·21 per cent. in the Small Town Districts; 185 or 11·22 per cent. in the Mainland-Rural Districts; and 207 or 11·50 per cent. in the Insular-Rural Districts. Of such deaths Phthisis is the chief cause, 7299 dying from this disease in Scotland during 1900, males 3708, females 3591, together equal to 166 in every hundred thousand of the inhabitants, and 8·95 per cent. of all deaths. The mortality rate to population from Consumption in each district is 188 in the Principal Town Districts, 169 in the Large Town Districts, 147 in the Small Town Districts, 139 in the Mainland-Rural Districts, and 182 in the Insular-Rural Districts. In every 100 male deaths from this disease, 318 or 8·6 per cent. of all died under 15 years of age, 2554 or 68·9 per cent. between 15-45 years, and 836 or 22·5 per cent. at greater ages: the corresponding proportions among the females being 441 or 12·3 per cent. under 15 years of age, 2585 or 72·0 per cent. between 15-45 years, and 565 or 15·7 per cent. at greater ages. In Dundee 213 in

every hundred thousand of its inhabitants died from Phthisis during the year, 208 in Perth, 198 in Glasgow, 193 in Leith, 190 in Edinburgh, 175

deaths in Scotland, males 501, females 438; Tubercular Meningitis caused 1208 deaths, males 605, females 603; and Scrofula caused 890, males 489, females 401.

Diseases of the Brain and Nervous System account for 9408 deaths, males 4708, females 4700, giving a mortality rate of 214 per hundred thousand of population, and equal to 11·54 per cent. of all deaths. The highest rate occurs in the Principal Town Districts 226, and in the Large Town Districts 237, the lowest in the Insular-Rural Districts 146. Among the Principal Towns the rates fall as follows, the highest being 291 per hundred thousand of the inhabitants in Perth, followed by Paisley 285, Greenock 259, Dundee 239, Coatbridge 234, Aberdeen 229, Glasgow 226, Kilmarnock 222, Edinburgh 216, Govan and Partick 205, and Leith 157. Of these diseases in all Scotland Apoplexy caused 3333 deaths, males 1475, females 1858; Paralysis 1599, males 781, females 818; Epilepsy 292, males 163, females 129; and Convulsions 1178, males 672, females 506.

Diseases of the Circulatory Organs caused 7858 deaths, males 3759, females 4099, at a rate of 179 per hundred thousand of population, and

1869	64	1885	39		
1870	114	1886	24		

9·64 per cent. of the total deaths. The rates occur in the districts as follow:—168 in the Principal and Large Town Districts, 185 in the Small Town Districts, 204 in the Mainland-Rural Districts, and 156 in the Insular-Rural Districts. In the Principal Towns the highest rate is in Perth 218, followed by Dundee with one of 208, Edinburgh with one of 196, Aberdeen with one of 195, Greenock with one of 175, Leith with one of 166, Paisley with one of 162, Coatbridge with one of 154, Glasgow with one of 149, Kilmarnock with one of 141, and Govan and Partick with one of 122.

Diseases of the Respiratory Organs caused 15,018 deaths—males 7859, females 7159—giving a rate of 342 in every hundred thousand of population, and equal to 18·42 per cent. of all deaths. The rate in the Principal and Large Town Districts is above that for Scotland, being in the former 419 and in the latter 349 to the population as before; in the Small Town Districts the corresponding rate is 288, in the Mainland-Rural Districts 256, and in the Insular-Rural Districts 222. The percentages in each to the total deaths are 20·80 in the Principal Town Districts, 18·54 in the Large Town Districts, 16·51 in the Small Town Districts, 15·53 in the Mainland-Rural Districts, and 12·33 in the Insular-Rural Districts. Bronchitis caused in Scotland 6914 exits, males 3287, females 3627; Pneumonia caused 6270 deaths, males 3593, females 2677; and Croup caused 190, males 109, females 81. In the Principal Towns of Scotland the highest rate from this class of disease occurred in Glasgow, where in every hundred thousand of its inhabitants 496 so succumbed; in Dundee the rate is 482, in Govan and Partick it is 403, in Coatbridge it is 385, in Perth it is 383, in Paisley it is 371, in Aberdeen it is 330, in Greenock it is 328, in Edinburgh it is 318, in Leith it is 278, and in Kilmarnock it is 258.

From diseases of the Digestive System there are 5777 deaths in all, males

2959, females 2818, together affording a mortality rate of 131 in every hundred thousand of population, and forming 7·08 per cent. of all the deaths. In each Urban District the rate is higher than that for Scotland, being to population 142 in the Principal Town Districts, 137 in the Large Town Districts, and 134 in the Small Town Districts; in the Mainland-Rural Districts it is 111, and in the Insular-Rural Districts 90 in like ratio. The rates in the Principal Towns are 160 in Aberdeen, 157 in Coatbridge, 155 in Paisley, 151 in Glasgow, 144 in Perth, 138 in Kilmarnock, 132 in Dundee, 130 in Edinburgh, 120 in Govan and Partick and in Greenock, and 111 in Leith. Enteritis caused 1675 deaths, males 894, females 781; Peritonitis caused 753, males 387, females 366; Hernia caused 159, males 90, females 69; Liver Diseases caused 787, males 399, females 388; Pleus, Stricture of the Intestine, and Intussusception, together caused 476, males 242, females 234.

Diseases of the Urinary Organs are accountable for 2185 deaths, males 1311, females 874, together giving a death-rate of 50 per hundred thousand of population, and 2·68 per cent. of all deaths. Acute Nephritis caused 471 deaths, Bright's Disease 1069, Calculus 27, other diseases of the Bladder and Prostate 388, and 230 are caused by various morbid conditions of the same organs not mentioned above.

Diseases of the Organs of Reproduction or Generation caused 526 deaths, males 8, females 518. To Ovarian Disease 57 deaths are due, and to Uterine Affections 90. Diseases incidental to Parturition inclusive of Puerperal Fever, to which latter 225 deaths are ascribed, together cause a total of 567.

From diseases of the Organs of Locomotion—Bones and Joints—there

are 297 deaths, males 176, females 121, equal to 7 in each hundred thousand of population; and to diseases of the Skin 213 deaths are ascribed, males 101, females 112.

Developmental Disease, not including Old Age, is credited with 2764 exits, males 1534, females 1230. Premature Birth accounts for 2172, Atelectasis for 180, Cyanosis, Spina Bifida, and other Congenital Malformations for 412. The deaths of 4585 persons are ascribed to Old Age, males 1695, females 2890, at a rate of 104 per hundred thousand of population. At ages between 95-100 years 41 men and 108 women died, while 3 of the

From Violence 3422 lives were lost, males 2483, females 939, together giving a mortality rate of 78 per hundred thousand of population (male rate 116, female 42), and equal to 4.20 per cent. of all deaths. Accident or Negligence accounts for 3181, males 2312, females 869. Those due to Violence other than Accident give a total of 241, males 171, females 70, and of those 19 are Homicidal and 222 Suicidal.

Of the Accidental deaths 166 occurred in mines and quarries, all males. Railways were the cause of 286, males 275, females 11. Horses caused the death of 15, males 13, females 2; and Machinery of 35 males. The lives of 446 persons were terminated by Suffocation, males 241, females 205, of whom 107 males and 112 females died thus in bed.

Drowning accounts for 651 deaths, males 554, females 97; of those 592 are Accidental, males 518, females 74, and 58 Suicidal, males 36, females 23. From Poison 142 deaths are registered, males 99, females 52. In the case of 78 males and 47 females the poisoning was accidental, while 12 males and 5 females had recourse to poison for the purpose of ending their own lives.

The poisons which caused death accidentally are Opium in the case of 17 males and 13 females; Morphia, 1 male, 2 females; "A Narcotic," 3 males, 1 female; Chloroform, 9 males, 3 females; Carbolic Acid, 6 males, 5 females; Phosphorus, 2 males, 1 female; Ammonia, 1 male, 3 females; Ammoniacal Fumes, 2 males; "A.B.C." Liniment, 1 male, 1 female; Belladonna, 1 male; Hydrocyanic Acid, 1 male; Arsenic, 1 female; Bichromate of Potash, 1 male; Saltpetre, 1 female; Bisulphide of Carbon, 1 male; Lead, 5 males; Alcohol, 4 males, 3 females; Methylated Spirits, 1 female; a Ptomaine, 8 males, 4 females; Coal Gas, 4 males, 5 females; Carbonic Acid Gas, 3 males; "Poisonous" Gas, 1 male; Dynamite, 1 male; an Irritant Poison, 1 male, 1 female; Unripe Fruit, 1 male, 1 female; Eating Some Plant, 1 female; Not Stated, 4 males.

The poisons by which Suicide was effected are Opium, 7 males, 2 females; Chloral, 1 female; Carbolic Acid, 2 males; Mercury, 1 male; Arsenic, 1 male; Ammonia, 1 female; Antimony, 1 female; Not Stated, 1 male.

Table XXXIX α shows the method by which Suicide was accomplished in Scotland in each of the Five Districts, Counties, and Principal Towns during 1900:—Thus in Scotland 10 males and 1 female ended their existence on railways, 13 males and 1 female shot themselves, 40 males and 9 females died by cutting or stabbing themselves, 6 males and 3 females threw themselves from a height, 36 males and 23 females drowned themselves, 43 males and 19 females hanged themselves, 12 males and 3 females had recourse to poison, and 1 male took his own life in a manner which is not stated.

Sixty-five of the male Suicides and 15 of the female were effected in the Principal Town Districts, 15 of the male and 7 of the female in the Large Town Districts, 45 of the male and 16 of the female in the Small Town Districts, 33 of the male and 21 of the female in the Mainland-Rural Districts, and 3 of the male and 2 of the female in the Insular-Rural Districts.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of the year are the Notes made by Dr. Buchan, under the direction of the Council of the Scottish Meteorological Society, which appear in the Registrar-General's Quarterly Reports:—

The weather of *January* was characterised by a barometric pressure a little under the average, with a small monthly range; a mean temperature rather above the average, with a mean daily range much less than the average; a mean humidity a little above the average; a mean rainfall considerably above the average, and falling on a very large number of days, not hitherto exceeded in January; and two days' excess of westerly and two days' excess of east-north-easterly winds.

The mean barometric pressure was very unequally distributed, the greater depression, being in the north-east, amounted to half the tenth of an inch. On the other hand, in the west from the South Hebrides to Islay, pressure was nearly two hundredths above the average.

The mean temperature was $38^{\circ}\cdot 5$, or $1^{\circ}\cdot 3$ above the average, the temperature of the days being $1^{\circ}\cdot 0$ and the nights $1^{\circ}\cdot 7$ higher. The excess of temperature was, on the whole, equally distributed over the various districts of the country. The absolutely highest temperature was $59^{\circ}\cdot 0$ on the 22nd and 23rd at Broomlands, and the lowest $20^{\circ}\cdot 0$ on the 1st at Dollar. A marked feature of the temperature was the comparatively high readings which obtained during the nights. In previous Januarys the lowest night temperature in 1898 was $22^{\circ}\cdot 5$, in 1882 $21^{\circ}\cdot 9$, and in 1900 it was $20^{\circ}\cdot 0$. In all the other years since 1856, much lower readings were obtained in Scotland. In 1900 the lowest reading at Leith was $32^{\circ}\cdot 1$.

The mean rainfall was 5·14 inches, or 25 per cent. above the average. Its distribution over the country was very peculiar, being slightly under the average, or only very slightly above it in Galloway, and on the west coast from Cape Wrath to Skye; but in all other parts of the country above the average, and over great breadths very considerably so. The excess was greatest on the coasts of the Moray Firth and for some distance inland, being generally upwards of 60 per cent.; between two lines, one drawn from Islay to Aberdeen, and the other from Ayr to the mouth of the Tweed. Here the excess rose to 103 per cent. at Campbeltown. 90 per cent. at Montrose, and 73 per cent. at Smeaton in East Lothian; and very generally over this wide district the excess was one-half more than the average. The month was persistently rainy throughout, there being no day of the month on which rain did not fall at a large number of the stations. The largest monthly amounts were 13·47 inches at Lochbuie and 12·84 inches at Glen-carron: whilst on the top of Ben Nevis 35·32 inches fell, being the heaviest fall in January hitherto recorded at this elevated position.

The weather of *February* was characterised by a very low mean barometric pressure, with a very large monthly range; an unusually low mean temperature, with a large mean daily range; a very low mean humidity; a mean rainfall somewhat above the average, falling on nearly the usual number of days for February; and a large excess of north-easterly winds, blowing with a force a little under the average.

The mean barometric pressure was 29·549 inches, or 0·304 inch below the average. This is one of the lowest mean pressures yet recorded for this month. It was much more below the average in the south and east than in the north and west; thus, while on the Solway pressure was 0·355 inch under the average, at North Unst it was only 0·137 inch. The relatively higher pressure thus indicated at northern and western stations than usual, resulted in an excess of wind two days from N., and one day from each of the directions N.E., E., and S.

The mean temperature was $32^{\circ}\cdot 2$, or $6^{\circ}\cdot 1$ less than the average, the days being $5^{\circ}\cdot 2$ and the nights $7^{\circ}\cdot 1$ colder than usual. This is the second lowest

mean temperature that has occurred since 1856, the lowest being $29^{\circ}0$ in 1895, when a like excess of north-easterly winds prevailed. In that year, the mean barometric pressure was one of the highest recorded, but in that month, as stated at the time, "pressure was, as compared with the average, much higher in the north and west than in the south and east, and accordingly northerly and easterly winds prevailed five days more than the average"; thus showing impressively that it is the manner in which barometric pressure is distributed over the country, and not the amount of the pressure that rules the character of the weather. As happens in such weather at this season, the lowest temperatures were experienced at inland stations, whereas round the coasts the weather was much less severe. The absolutely highest temperature was $54^{\circ}2$ at Belvidere Hospital, Glasgow, and the lowest $-1^{\circ}0$ at Drumlanrig on the 12th.

The mean rainfall was 3.55 inches, or 14 per cent. above the average. The rainfall, including snow, was above the average at stations in the east from the mouth of the Spey to the Tweed and for a considerable distance inland; in Galloway and South Ayrshire, Bute and Arran, and at several places in Orkney and Caithness. In all other parts of the country less than the average rainfall was recorded. In several places the amount was very great, exceeding their averages, in percentages, 210 at Duns Castle; 145 at Broomlands; 125 at Gordon Castle and St Abbs; 98 at Logie Coldstone; and fully 80 at stations in Mid and East Lothian. On the other hand, to the west of a line drawn from Nairn to Oban, the average deficiency was about 50 per cent. The third week of February 1900 will be long remembered for the widespread and severe wind and snowstorms, for the shipping disasters all round the Scottish coasts, and for serious interruption to telegraphic and railway communication.

The weather of *March* was characterised by an unusually high barometer, with a monthly range considerably under the average; a very low mean temperature, with a mean daily range a little under the average; a mean humidity slightly under the average; a very small rainfall, falling on four days fewer than the average; and six days' excess of northerly and easterly winds.

The mean barometric pressure was 30.074 inches, or 0.248 inch above the average. This high pressure has been exceeded only in 1856 and 1875 when it was respectively 30.195 inches and 30.151 inches. The excess was very much larger at western and northern stations than at stations in the east and south. From this manner of distribution of the pressure resulted the extraordinary prevalence of northerly and easterly winds, with the accompanying dryness and cold which marked the weather of the month.

The mean temperature was $37^{\circ}3$, or $2^{\circ}1$ less than the average, which was nearly equally distributed between the days and the nights. Temperature was considerably lower in the east and south than in the west and north. The absolutely highest temperature was $59^{\circ}0$ on the 11th at Ochertyre; and the lowest $3^{\circ}0$ on the 18th at Haddo House.

The mean rainfall was 1.31 inch, or 54 per cent. under the average. The greater part of this precipitation fell as snow. To the east of a line passing through Montrose, Braemar, Nairn, Invershin and Dunrobin, the precipitation was above the average, in a few cases largely so, the excess being occasioned by the heavy snowfalls. In all other parts of Scotland the amounts were under the averages. Indeed, over extensive districts, only from a tenth to a fourth of the average was collected. During the first fortnight little or no rain or snow fell, except in the above districts

where for the month the average was exceeded. At the Ben Nevis Observatory, which was in the very dry district, 3·84 inches were collected, being the lowest hitherto recorded in March, and forming a strong contrast to the preceding January, when there fell 35·32 inches of rain and melted snow.

The weather of *April* was characterised by a mean barometric pressure a little less than the average, with a monthly range greatly above it; a mean temperature a degree and a half above the average, with a mean daily range unusually large, being, indeed, only exceeded since 1856 by the Aprils of 1892 and 1893, the means of which were respectively 18°·5 and 18°·7; a mean humidity, a little under the average; a mean rainfall, a little in excess of the average, falling on three days more than the average; and a large excess of W.-N.-W. winds.

The mean barometric pressure was 29·850 inches, or 0·038 inch less than the average. The deviations from the averages among the stations differed very widely from each other. Thus, while in Shetland mean pressure was 0·100 inch less than the average, at the Mull of Galloway it was 0·025 inch above it; and, further, the deficiency was much greater at eastern than at western stations—resulting in 4 days' excess of W. winds and two days of N.-W. winds, and a corresponding deficiency of easterly winds.

The mean temperature was 45°·7, or 1°·5 above the average, the days being 3°·0 above the average, while the nights were only the average. Thus the higher temperature was wholly occasioned by the greater warmth of the days. In Shetland and Caithness the mean temperature was about half a degree under the average, but temperature gradually increased on advancing inland towards the south-east, till it rose to 2°·0 above the average over the district lying between the Firth of Forth and the Tweed. On the other hand, the excess of temperature was only half a degree over Galloway. At the end of the third week temperature was unusually high for the season, when the absolutely highest for the month (75°·0) occurred at Aberdeen on the 20th. On the other hand, low temperatures were observed in the beginning of the first and the fourth weeks, the absolutely lowest for the month being 21°·0 on the 30th at Lednathie.

The mean rainfall was 2·66 inches, or 20 per cent. above the average. The rainfall was under the average to the east of a line drawn from Peterhead, and passing Braemar, Ochtertyre and Rosewell to the mouth of the Tweed, the prevailing winds having been, in crossing the Grampians, drained of much of their moisture. Over this important agricultural part of Scotland, the deficiency was from one third to a half of the average rainfall of April. Over all other parts of the country the rainfall exceeded the average, the greatest excess, nearly double the average, falling over the districts to north-west of the Grampian Range. At stations in the west from Mull to the Solway, the excess was only from one sixth to half the average. The larger portion of the rain fell from the 10th to the 16th. Fogs were pretty general on the 18th and 19th in the west, and more general from the 21st to the 24th. Storms occurred from the 3rd to the 5th in Orkney and Shetland; and from the 12th to the 16th south of the Grampians.

The weather of *May* was characterised by a mean barometric pressure slightly under the average, with a monthly range greatly above it; a mean temperature a little under the average, with a mean daily range half a degree under it; a mean humidity considerably under the average; a mean rainfall a little above the average, falling one day more than the average; and the wind near the average both as regards direction and force.

The mean barometric pressure was 29·923 inches, or 0·017 inch less than the average. Departures from the averages varied considerably in different districts; the greatest difference, 0·050 inch under the average, was in the southern half of the Outer Hebrides, whilst, in Wigtownshire, pressure slightly exceeded the average.

The mean temperature was 48°·7, or 0°·3 less than the average, the days being 0°·5 above the average, and the nights the average. The distribution of temperature was very irregular, being above the average within the space circumscribed by a line passing through Dundee, Kingussie, Glencarron, Monach, Barrahead, Campbeltown, Turnbery, Roslin, and St. Abbs. The highest temperatures, about a degree above the average, were in Mid and East Lothians, and Lower Clydesdale. On the other hand, in Galloway, Islay, and Orkney, temperature was a degree under the average, and in Shetland a degree and a half. The absolutely highest temperature was 75°·0 on the 16th at Paisley, and the lowest, 21°·8, on the 2nd at Lednathie.

The mean rainfall was 2·52 inches, or 10 per cent. above the average. Its distribution was extremely irregular, being in excess of the average in Caithness, the Outer Hebrides, and to the south and west of a line passing through Glenquoich, Braemar, Dollar, Dumbarton, Leadhills, and Wolfelee. Over this large area, the excess was generally a half more than the average, which, however, was much exceeded at individual stations, being above the average stated in percentages, 135 at the Mull of Kintyre; 120 at Leadhills; 103 at Stronvar; 89 at Cally; and 82 at Fort William. Elsewhere, the rainfall was under the average, the greatest deficiency occurring south of the Firth of Forth and in Aberdeen, where the fall was only half the average. Nearly the whole of the rain fell during the first and third weeks. Almost no rain fell from the 9th to the 16th and on the last three days of the month. The first five days of the month were stormy, especially in the west. Thunderstorms were not reported.

The weather of *June* was characterised by a mean barometric pressure somewhat under the average, with a monthly range a little above it; a mean temperature nearly a degree above the average, with a mean daily range just below the average; a mean humidity considerably above the average; a mean rainfall, fully half an inch more than the average, falling on two days in excess of the average; and four days' excess of easterly winds, blowing with a force much under the average.

The mean barometric pressure was 29·883 inches, or 0·059 inch less than the average. Barometric pressure was under the average to a much greater extent in the south and west than in the north and east, thus forming gradients for the excess of easterly winds which prevailed.

The mean temperature was 55°·7, or 0°·8 above the average, the excess being equally partitioned between the days and nights. Owing to the great excess of easterly winds from the North Sea, which, at this season, is much lower in temperature than the land, the mean temperature over a narrow strip along the whole of the east coast was under the average, the deficiency at a number of stations amounting to a degree and a half; and it is deserving of remark that the deficiency extended inland down the Caledonian Canal as far as Fort Augustus. Over every other part of Scotland temperature was above the average, the greatest excess, from 2°·0 to 3°·5, being at western stations, in other words, in those districts at which the easterly winds arrived after the longest passage over the heated land. Thus, while at Peterhead temperature was 1°·8 under the average, it was 3°·4 above it at Kyleakin; and while at Arbroath it was 1°·6 under, it was 3°·1 above the average at Rothesay. The absolutely highest temperature was 79°·0 at

Fort William on the 13th, Airds on the 10th, and Rothesay on the 16th; and the lowest $33^{\circ}0$ on the 23rd at Lednathie.

The mean rainfall was 3.17 inches, or 23 per cent. above the average. The distribution of the amount was extremely irregular. It was under the average near the coast from the Firth of Forth to Montrose; the north-east of Aberdeenshire; the head of the Moray Firth, Caithness, Orkney, and Shetland; and nearly the whole of the West Coast from Cape Wrath to the Mull of Galloway. In these scattered districts the deficiency varied generally from 25 to 75 per cent. Over all the rest of Scotland, the rainfall was above the average. In some places the excess was great, being stated in percentages, 122 at Dumbarton; 113 at Stobo Castle; 100 at Cally; and more than 75 per cent. at Dumfries, Glasgow, Lednathie, and Haddo House. The first five days of the month were rainless, but rains were frequent and mostly widespread during the rest of the month. Thunderstorms, often accompanied with heavy rains, were unusually frequent during the month, particularly on the 6th, 10th to the 13th, 20th to the 23rd, and 30th. The thunderstorm of the 11th was remarkably severe. But the most striking meteorological feature of the month was the extraordinary prevalence of fogs in the east and north as far as North Unst from the 2nd to the 4th, and 14th to the 24th. Fogs, but much less general and persistent, occurred in the west to the south of Islay from the 5th to the 19th. No storms of wind are reported.

The weather of *July* was characterised by a mean barometric pressure considerably above the average, with a monthly range a good deal under it; a mean temperature greatly in excess of the average, with a mean daily range a degree under it; a mean humidity a little above the average; a mean rainfall a little above the average, falling on four days more than the average.

The mean barometric pressure was 29.929 inches, or 0.043 inch more than the average. The singular feature of the geographical distribution of pressure is that it was greater in the extreme northern and extreme southern stations than at stations intermediate, resulting in a greater prevalence of northerly winds in the northern half of Scotland, and south-westerly winds in the southern half of Scotland, accompanied with the differences of temperature observed under these conditions.

The mean temperature was $58^{\circ}9$, or $1^{\circ}7$ above the average, the days being $1^{\circ}1$ and the nights $2^{\circ}2$ above the respective averages. The distribution of temperature was very unequal. In Shetland, where northerly winds prevailed most, it was half a degree under the average; whereas in the south, where southerly winds prevailed, the excess was about three degrees in Tweeddale. This district being well protected to westward by broad ranges of hills, the winds on arriving there were drier, and the sunshine consequently stronger. The warmest weather was from the 11th to the 20th, and 23rd to 28th. The absolutely highest temperature was $83^{\circ}0$ on the 20th at Pinmore; and the lowest, $36^{\circ}0$, on the 7th at Benquhat, and on the 8th at North Esk Reservoir.

The mean rainfall was 3.61 inches, or 15 per cent. above the average. The amounts of rainfall were very unequally distributed. South of the Forth and Clyde it was generally, but to no great extent, under the average; also slightly under the average in western Ross-shire. On the other hand, it was above the average in the northern islands, Caithness, the shores of the Moray Firth, and along the east coast as far south as Arbroath, the excess exceeding 70 per cent. at Bressay, Stromness, Thurso, Pentland Skerries,

Dunrobin, and Gordon Castle. A striking feature of the rainfall was the unusual frequency with which it fell, and a singular absence of heavy daily falls anywhere. Except at a very few places during thunderstorms, the amount collected on any day did not exceed an inch. Thunderstorms were of general occurrence on the 2nd, 3rd, 12th, 16th, 20th, and 21st. There were no gales or storms of wind.

The weather of *August* was characterised by a mean barometric pressure and monthly range both much in excess of the average; a mean temperature somewhat under the average, with a mean daily range also under the average; a mean humidity a little under the average; a mean rainfall about a fourth part above the average; and six days' excess of northerly and easterly winds.

The mean barometric pressure was 29·950 inches, or 0·092 inch in excess of the average. The excess was very much greater in the north and east than in the south and south-west. This distribution of the pressure resulted in the prevalent winds above referred to, the winds in excess of the average being N. 1 day, N.E. 2 days, E. 3 days, and S.E. 1 day.

The mean temperature was 55°·8, or 0°·8 less than the average, the days being 1°·1 and the nights 0°·6 less than the average. The distribution of the temperature over the country was unusually abnormal. Everywhere to the north and west of a line from Inverness, passing down the Caledonian Canal to Oban, and thence to Greenock and Loch Ryan, temperature was above the average; but in all other districts it was under the average, the greatest deficiency from 1°·5 to 2°·0 occurring in the east from Kinnaird Head to the Tweed, at which the easterly winds arrived direct from the sea. But as winds advanced westward, temperature gradually increased till at Rothesay, Paltalloch, and Skerryvore it was a degree above the average, and in the Outer Hebrides nearly two degrees. The absolutely highest temperature was 82°·8 on the 14th at Lairg, and the lowest 34°·0 on the 27th at Kingussie.

The mean rainfall was 4·46 inches, or 23 per cent. above the average. It was under the average in Shetland, Orkney, Caithness, Sutherland, Wester Ross, Skye, and detached portions of Perthshire, and Argyllshire, the deficiency scarcely exceeding a third of the average anywhere. In other

YEAR	46·4	82,267	12,000	12,000	45·8

parts of the country the rainfall was above the average, the greatest excess being south of the Forth and Clyde. The greatest excess was fully 80 per cent. in Berwickshire, and fully 50 per cent. in Galloway. Little rain fell from the 13th to the 18th, and from the 24th to the 30th. On the other hand very heavy daily falls are reported on the 1st, 6th, 12th, 19th to the 22nd and the 31st; the weather of this month thus differing widely from that of July. On the above dates daily falls of upwards of an inch were frequent, and even daily falls exceeding two inches were not uncommon. These heavy rains often accompanied with high winds did great and extensive damage to the standing crops, and seriously interfered with the use of the reaping machine. Storms, as distinguished from high winds, occurred only in the north-east, from Montrose to Nairn on the 6th and 7th, and round the Minch on the 22nd and 23rd.

The weather of *September* was characterised by a rather high barometric pressure, with a monthly range considerably above the average; a mean temperature, a degree above the average, with an extraordinarily high mean daily range, higher indeed than any that has occurred during the past 45 years; a mean humidity unusually low; a mean rainfall slightly under the average, falling on one day less than the average; and an unwonted excess of westerly winds.

The mean barometric pressure was 29·958 inches, or 0·115 inch above the average. The excess was greater in the west than in the east, and very much greater in the south than in the north, the excesses being 0·067 inch

TABLE XLI.—Meteorology of Scotland for 1900, deduced from Observations made at 65 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1900.

in Shetland and 0·158 inch on the Solway. This distribution resulted in an excess of four days of westerly winds connected with anticyclones which frequently prevailed with their centres generally to the south-east and south. Thus these westerly winds were, especially in all eastern districts, very dry.

The mean temperature was 53°·8, or 1°·0 above the average, the days being 2°·3 above and the nights 0°·4 under the average, being the simple result of the strong insolation through the dry atmosphere which prevailed. The increase of temperature was pretty equally distributed over the country, except that it was a little greater over the more southern districts well sheltered from the westerly winds. The absolutely highest temperature was 83°·5 on the 14th at Lairg, and the lowest 27°·2 on the 25th at Montrose.

The mean rainfall was 3·33 inches, or 8 per cent. under the average. It was above the average in Shetland, Orkney, the West Coast from Cape Wrath to the Mull of Kintyre, the Outer Hebrides, Kinross and West Perthshire. The excess was 90 per cent. at Stornoway, and about 60 per cent. at Stromness, Cape Wrath, Stoerhead and Fladda. In all other districts the rainfall was under the average, the greatest deficiency being about 50 per cent. in the north-east of Aberdeenshire, at Montrose and in lower Tweeddale. Nearly all the rain fell from the 4th to the 10th and from the 18th to the 30th. The heaviest daily falls, being in many cases considerably above an inch, were recorded on the 26th, 27th, 29th and 30th. The largest rainfall at any of the stations was 16·96 inches on Ben Nevis, and the smallest 1·14 inch at Montrose, and 1·15 inch at Broomlands. The month was remarkable for the absence of thunder, the only instance reported being at Lednathie on the 18th. Aurora is reported from Ben Nevis on the 16th.

The weather of *October* was characterised by a mean barometric pressure

very nearly the average of the month, with a monthly range much under the average; a mean temperature a degree under the average; a mean daily range a degree above the average; a mean humidity the average; a very large mean rainfall, larger indeed than any that has occurred in October since 1874, falling on 4 days more than the average; and 7 days' excess of W.N.W. winds, of less than their usual force.

The mean barometric pressure was 29·804 inches, being very slightly less than the average. Pressure was, however, rather unequally distributed, being above the average to west of a line drawn from Dumfries to Stornoway, but under the average over all other districts of the country. The inevitable result of this higher relative pressure in the west, and lower in the east, was the unusual predominance of W.N.W. winds which prevailed 7 days more than the average.

The mean temperature was 45°·5, or one degree under the average, the days being 0°·4 and the nights 1°·5 under the average. Hence the low temperature was mainly occasioned by the greater cold of the nights during these W.N.W. winds. The greatest depression of the temperature occurred at eastern and inland stations to the north of the latitude of the Firth of Tay, being generally about a degree and a half; but to the south of this only about half a degree, and over considerable portions of these divisions of Scotland temperature exceeded the average about the third of a degree. The absolutely highest temperature was 66°·4 on the 18th at Lairg, and the lowest 21°·4 on the 16th at Kingussie.

The mean rainfall was 5·12 inches, or 27 per cent. above the average. Its distribution over the country was singularly unequal, being above the average except in a few scattered and limited districts in the Hebrides, in Aberdeenshire, and round the shores of the Moray Firth, where it was slightly under the average. The largest falls, exceeding the average by 50 per cent., occurred in Mid and East Lothians and at places in the

counties of Fife, Berwick, Ayr, Orkney, and Shetland. Much the largest proportion fell during the first half of the month, the heaviest falls being from the 4th to the 13th, and on the 17th and 31st.

The weather of *November* was characterised by a very low mean barometric pressure and a rather low monthly range; a mean temperature about a degree above the average, and a mean daily range nearly a degree under it; a mean humidity which has not been exceeded since 1864; an unusually large mean rainfall, falling on 4 days more than the average; and 3 days' excess of E.S.E. winds.

The mean barometric pressure was 29·696 inches, or 0·134 inch less than the average. North of the Grampians barometric pressure was relatively much lower than to the south. Thus in the counties of Wigtown and Berwick, pressure was 0·164 inch, and at North Unst only 0·040 inch under the averages. Thus gradients were formed for the south-easterly winds which prevailed.

The mean temperature was 42°·0, or 1°·1 above the average, the days being 0°·7 and the nights 1°·5 above the average, the higher temperature being thus occasioned by the warmer nights. Everywhere over the country the temperature was in excess of the average, the excess being greatest at eastern stations, and least in the west and in inland situations. The absolutely highest temperature was 64°·0 on the 1st at Loanhead, and the lowest 18°·0 on the 19th at Stobo Castle.

The mean rainfall was 4·92 inches, or 28 per cent. above the average. Everywhere south of the Grampians it was above the average, and round the Moray Firth from the Spey northwards, or over those districts open to the south-easterly and easterly winds; the greatest excess, fully 50 per cent. occurring from the Dee to the Tweed. In other districts it was slightly under the average. Little or no rain fell from the 17th to the 21st, but fell nearly every day during the rest of the month. Thunder was nearly altogether absent.

The weather of *December* was characterised by a very low mean barometric pressure, with a rather low monthly range; by a mean temperature higher than any recorded in December since 1865, with a mean

TABLE XLIV.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1900, and Proportion at each Age in every Hundred Deaths per Month.

daily range slightly less than the average; a mean humidity a little under the average; a mean rainfall only exceeded since 1856 by the rainfall of December 1876, which was 7.57 inches as against 7.01 inches of 1900; this heavy rainfall fell on 25 days, being 8 days more than the average, and larger than any month during the past forty years; and 4 days' excess of westerly winds, blowing with a force far exceeding the average.

The mean barometric pressure was 29.620 inches, or 0.162 inch less than the average. The depression below the average was very much greater in the north than in the south, being 0.220 inch in Shetland, but only 0.134 inch at the Mull of Galloway. Thus very steep gradients were formed from south to north, occasioning the unusual prevalence of the westerly winds of the unusual strength as stated above.

The mean temperature was 42°.7, or 4°.7 above the average, the days being 4°.5 and the nights 4°.9 above the average. This extraordinarily high temperature was generally distributed over all parts of the country, with the exception that the excess was a little greater in inland situations, as happens with this type of weather. The absolutely highest temperature was 59°.0 on the 14th at Perth, and the lowest 22°.5 on the 4th at Lairg. The absence of very low temperature is a marked feature of the meteorology of this month.

The mean rainfall was 7.01 inches, or 69 per cent. above the average. The rainfall was very slightly under the average in the eastern portions of the counties of Aberdeen and Caithness, the greatest deficiency being 24 per cent. at Haddo House and 12 per cent. at Wick. Everywhere else it was above the average, the greatest excesses being, in percentages, 157 at Kingussie, 141 at Stronvar, 130 at North Esk Reservoir and Cromarty, and fully 100 per cent. at Wolfelee, Drumlanrig, Paisley, Roslin, Stirling, Fort Augustus, and Invergarry.

From Table XL. onward some idea may be gained regarding the connection there is between the general mortality, as also that from some special diseases, and the meteorological conditions of the successive months of the

TABLE XLV.—Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1900.

YEAR . . .	12,326	2,408	11,433	7,933	34,100	12,000

year, the information for which is chiefly furnished by returns made by observers in eight of the Principal Towns in Scotland.

Tables XL. and XLI. deal with Scotland as a whole, the former Table indicating the mean temperature for the year ($46^{\circ}\cdot4$) to be somewhat above that of the mean of a series of years (1881-1890) placed alongside for comparison. The mean temperature in the case of eight of the twelve months of 1900 is above that for those same during the ten years. The mean temperature of 1900 is a little below that of 1899.

From Table XLI. it is evident the heaviest mortality occurs during or immediately after the colder and more inclement months, being least so during the warmer, inasmuch as 11·30 per cent. of the deaths were registered during February, 10·33 per cent. during January, 10·10 per cent. during March, 8·82 per cent. during April, 8·11 per cent. during December, 7·98 per cent. during May, 7·76 per cent. during November, 7·59 per cent. during October, 7·16 per cent. during July, 7·09 per cent. during June, 6·95 per cent. during August, and 6·81 per cent. during September.

Table XLII., which refers to eight of the Principal Towns, indicates how Miasmatic diseases generally were most fatal during the first three and last months of the year, those with the lowest mean temperature, being at their minimum during the milder months. The special Miasmatics, or, as they may be called, Acutely Febrile diseases, which on this occasion may have caused this are Measles and Hooping-Cough, diseases which, besides from their own specific fatality, are on account of their sequelæ especially dangerous. Smallpox caused 42 deaths in those towns during the year, besides those (11) which occurred outwith them. Scarlet Fever deaths are most marked during the earlier and late months of the year, least so during the intervening. Diphtheria is, on the whole, most marked as a cause of death during the last four months of the year, and those from Fevers are more pronounced during the latter five months than during those of spring and summer. Of the deaths from Plague 7 are registered during September and 2 during October.

Diarrhœal disease is, as usual, most in evidence during the months of July, August, September, and October.

Phthisis, as a cause of death, is more marked during the first six months than during the last six, but each month it is large, the smallest number registered being 203 in November.

The more acute diseases of the Respiratory Organs, as Bronchitis and Pneumonia, attain their maximum mortality during January, February, and March, their minimum being during July and August.

Deaths from diseases of the Circulatory Organs are registered in largest numbers during January, February, March, and May, as is also the case with those from disease of the Brain and Nervous System.

The deaths from Old Age in those towns bulk most largely during the cold months of January, February, March, April, and December.

Tables XLIV. and XLV. are intended to show the monthly comparative mortality at four periods of life during 1900 in eight of the Principal Towns. Of the total 33,368 deaths in these towns 12,079, or 36·2 per cent. of them, were of children 0·5 years of age; 2363, or 7·1 per cent., were at ages 5-20 years; 11,187, or 33·5 per cent., were between 20-60 years; and 7739, or 23·2 per cent., were at ages over 60.

Children between 0·5 years of age succumbed in largest number during January, February, March, October, and November, those months during

which Miasmatics were particularly fatal, the smallest number during May and June.

Among Adolescents (5-20 years) deaths were more frequent during January, March, May, and July, months during which diseases of the Respiratory Organs and Phthisis were numerous. June and November show the fewest deaths at this age.

Adults, those between 20-60 years, suffered most during January, February, and March, inclement months, and those in which many deaths from Phthisis, Respiratory affections, and diseases of the Heart and Brain are caused.

Among the Aged, over 60 years of age, the heaviest mortality is during the early and late months of the year, and the lightest during the milder months of July, August, and September.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,

EDINBURGH, *8th September 1902.*

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing Towns of 2000 Inhabitants and upwards are printed in small capitals, thus:—CARLUKE.

An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more, than one Parish. The component parts of these Districts will be found at page 474.

A dagger "+" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
13	Birsay	Part of Harray and Birsay.
14	Deerness	Part of St Andrews.
18	Harray	Part of Harray and Birsay.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
37b	Keiss	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch	Parts of Contin and Urray.
86b	Carlaway	Parts of Barvas and Uig.
87	Lochs	Lochs, and part of Uig.
92b	Cannich	Parts of Kilmorack and Kiltarlity and Convinth.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
135	Elgin	Elgin, and parts of New Spynie, and St Andrews-Lhanbryde.
152	Enzie	Parts of Bellie and Rathven.
155b	Glenrinnies	Parts of Aberlour and Mortlach.
167	Seafeld	Parts of Cullen and Rathven.
171b	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinninmonth	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick, Tullich, and Glengairn.
222b	Millbex	Parts of Fyvie and Monquhitter.
227b	New Pittaligo	Parts of Abderdour, New Deer, Strichen, and Tyrie.
231	Peterculter	(1) Parts of City Parish of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells	Parts of Auchterless and Forgue.
266	Nigg	Nigg, and part of City Parish of Aberdeen.
282	Dundee	Dundee, and parts of Liff, Benvie and Invergowie, and Mains and Strathmartine.
294b	Kilry	Parts of Glenisla and Lintrathen.
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven	Parts of Auchtergaven and Logiealmond.
331	Balquhider	Balquhider, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Part of Dunkeld and Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle	Meigle, and part of Coupar-Angus.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and part of Kinnoull.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
394c	Tenandry	Parts of Blair-Athol and Moulin.
402	Anstruther-Easter	Anstruther-Easter, and part of Kiltrenny.
417	Craik	Part of Craik and May Island.
423	Dunbog	Dunbog, and part of Flisk.
425	Dunino	Dunino, and part of Craik.
442	Kirkcaldy and Abbotshall	Kirkcaldy, Abbotshall, and part of Kinghorn.
481b	Grangemouth	Parts of Bothkennar, Falkirk, and Polmont.
488	St Ninians	Parts of St. Ninians and Stirling.
490	Stirling	Parts of St. Ninians and Stirling.
496	Dumbarton	Dumbarton, and part of Cardross.
504	Ardochattan	Part of Ardochattan and Muckairn.
505	Ardnamurchan	(1) Part of Ardnamurchan and of Arisaig and Moldart.
506	Ballauchulish, etc.	Parts of Kilmallie and Ardgour.
509	Cumlodden and Minard	Parts of Glassary and Glenaray.
513	Inveraray	Inveraray, and part of Glenaray.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc.	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie	Parts of Kilmallie and Ardgour.
525	Lismore	Lismore and Appin, and part of Ardgour.
526	Lochgilphead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Ardochattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspelve	Part of Pennygown and Torosay.
547	Portmahaven	Part of Kilchoman.
548b	Salen	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
550	Torosay	Part of Pennygown and Torosay.
556	Lochranza	Parts of Kilbride and Kilmore.
559b	Bridge-of-Weir	Parts of Houston and Killellan, and Kilbarchan.
572	Neilston	(1) Part of Neilston; (2) Remainder of Neilston, and part of Paisley.
576	Ardrossan	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.

* The actual number of Districts is 1072—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.
